《ADMISSION POLICY》

◇ The Principles and Aims of the Integrated Doctoral School of Medicine, Engineering, and Agricultural Sciences and its Admission Policy

[Principles and Aims]

The aims of our education and research are: to cultivate superior scholars who can apply their academic studies to the solution of the problems today's society faces, and who, from a global viewpoint, can creatively advance them on which these applied results are based on; and to cultivate competent business specialists provided with high-grade academic knowledge.

[Educational Objectives]

We train scholars or skilled engineers who are provided with deep knowledge, high research competency and strict moral sense.

[Admission Policy]

We seek for individuals who have eagerness for making a contribution to the present and future generations by advancing fundamental or original researches.

Division of Engineering

• Engineering for Functional Material Systems

We seek for creative individuals who have eagerness for opening up and advancing further manufacturing markets by exerting their frontier knowledge and cutting-edge technology in the various researches and developments of nano-devices and of electronics materials.

• Information and Mechanical System Engineering

We seek for individuals who have eagerness for successful activities in the international projects, with the competency of designing, constructing and managing the wide-range of hardware, software and communication networks that are indispensable for manufacturing and information systems.

• Natural, Biotic and Social Environment Engineering

We seek for individuals who have eagerness for becoming professional engineers or scholars who are engaged: in the technology development with regard to the environment-oriented maintenance and preservation of social infrastructures; in the leading technology development of natural functions; and in the development of the preliminary surveying and evaluation methods of social policy and planning.

• Special Doctoral Program for Green Energy Conversion Science and Technology

We seek for individuals who have eagerness for becoming international scientists and engineers to realize low carbon society by use of knowledge and technologies of green energy conversion and storage such as fuel cells, solar cells, thermoelectric conversion.

This program has been selected as one of Leading Programs in Doctoral Education, supported by the Ministry of Education, Culture, Sports, Science and Technology in Japan.

- (4) Applicants will be informed of the results of the examination by June 9 (Friday), 2017.

6. Special measures for entrance examination

If you need special consideration in the entrance exam or in the course study, for such as physical disability, please consult us by May 26 (Friday).

7. Extended Credit System

This doctoral program (Division of Engineering) offers an extended credit system.

This system enables students whose hours of study are restricted because of having employment to get credits for a planned educational program over a fixed period (maximum of six years) exceeding the standard training year limit (three years) to complete the program. The yearly time load for the total number of units required for the credit is dramatically reduced because they are the same as that required under the three year program.

For details on this system, contact the Office for Faculty of Engineering Education Group (Graduate School). Tel:055-220-8730 (from abroad, +81-55-220-8730)

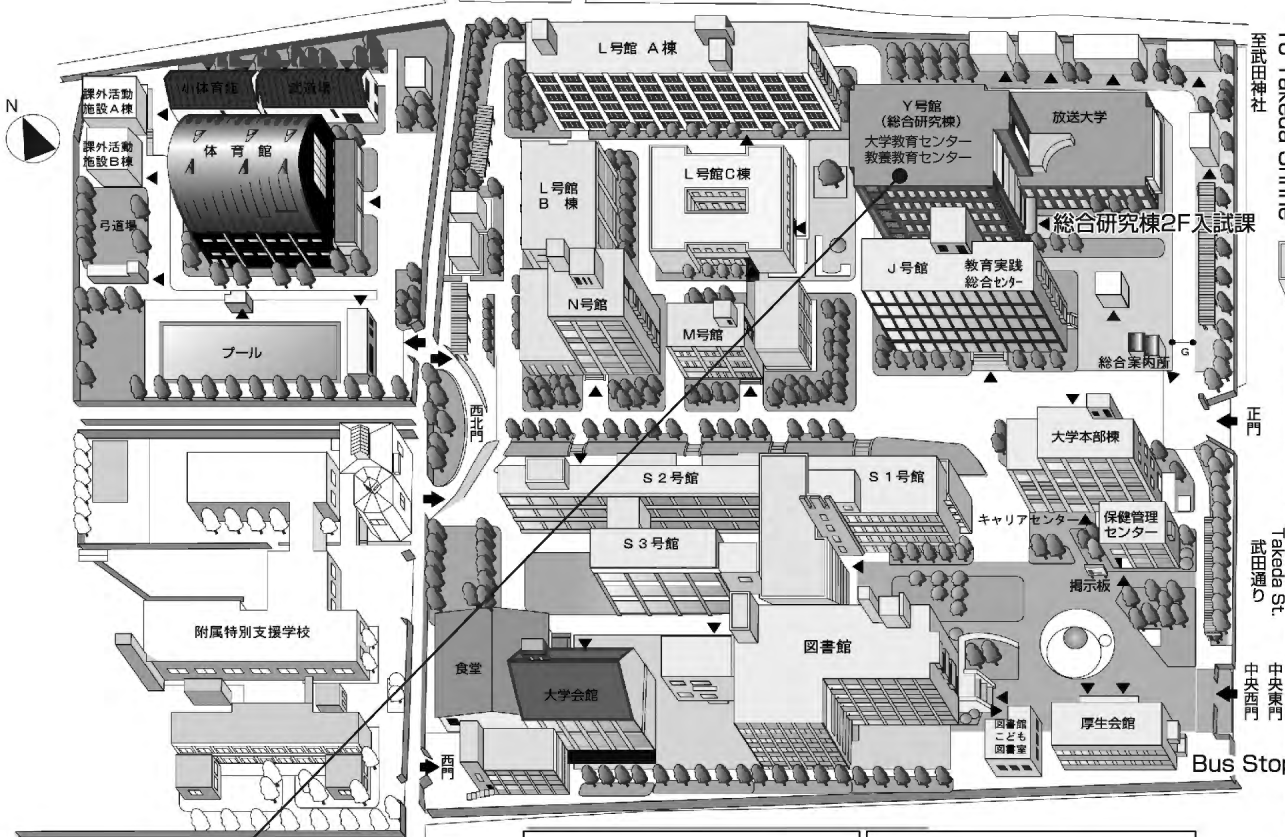

The due dates of application of this system are last day of August.

8. Other

Personal information other than your name, and address obtained your application will be used in (1) Selecting enrollees (application process, selection); (2) Announcement of successful applicants; (3) Enrollment; and (4) Statistical investigations. Testing records used in the selection of enrollees will be used to create study materials for methods of selecting enrollees in the future.

Note that personal information of enrollees obtained in applications will be used in (1) Educational activities (registration, student guidance etc); (2) Student support (health management, employment support, exemption from tuition · application for student loans); and (3) collecting tuition.
